

CONSTRUCTION WORK NOTIFICATION

Dear Resident,

This note is to advise you that construction work will be taking place at the cnr of Angwin St and Canning Hwy, the cnr of Preston Point Rd and Canning Hwy, and along Canning Hwy from 35 to Sewell St, starting on 6th March and is expected to finish by 9th March, between the hours of 8pm and 6am. The works are to facilitate an upgrade of the gas network in the area and are essential due to increased leaks occurring from the old galvanised pipe network. Due to restrictions put in place from Main Roads WA, we are required to undertake the works at night when the traffic volumes are much smaller. In order to minimise noise and disturbance, these activities are strictly controlled under a Noise Management Plan approved by the City of Fremantle and the Town of East Fremantle. Normal construction work will continue through Fremantle and East Fremantle until the end of October (if works proceed as planned). Our works will progress through the streets and will not affect one area for any longer than a few days.

Some general features of the Noise Management Plan are –

- Radio volume is to be maintained at a reasonable level (& not used before 7am or after 7pm)
- No deliveries of materials before 7am;
- No car radios allowed at any time.
- No scaffolding erection or dismantling before 7am.

The Noise Management Plan also places restrictions on the activities of each trade between 10pm and 6am. Should you be disturbed by activities on the site, require further information or have any comments with regards to health condition of any of the occupants of the residence that may be affected by the earlier start, please contact –

David Drewett of CIVCON on 0403162939.
