PROJECT BACKGROUND & OBJECTIVE

This Public Realm Style Guide has been commissioned by the Town of East Fremantle to support both the established and future use of the East Fremantle Town Centre. These guidelines aim to enhance the area's sense of identity and improve experiential quality within the Town. The emphasis focuses on complementing street character and improving pedestrian experience, comfort and amenity.

The purpose of this study is to establish consistent, cohesive design themes and assist the Town to ensure future development proposals contribute to a consistent, high standard of design within the study area.

STREET TREE LEGEND

- Study Area - Town Centre
- Agonis flexuosa
- Corymbia ficifolia
- Erythrina indica
- Eucalyptus cladocalyx
- Eucalyptus erythrocorys
- Eucalyptus todtiana
- Eucalyptus utilis
- Ficus rubiginosa
- Jacaranda mimosifolia
- Melaleuca quinquenervia
- Melaleuca viminalis
- Platanus x acerifolia

Species: **Agonis flexuosa**
Common Name: Peppermint
Mature Height: 8-10m
Origin: Western Australia

Large, spreading tree with dense willow-like foliage and a weeping habit. The leaves are pleasantly aromatic. The trunk can develop to a substantial, disproportionate width. Dark grey, furrowed bark. It produces prolific small white flowers in spring and summer.

Species: **Corymbia ficifolia**
Common Name: Red Flowering Gum
Mature Height: 5-10m
Origin: Western Australia

Widely cultivated medium sized, spreading dense canopied Eucalypt with very dark dull green foliage, which is a good foil for the brilliant display of bright red, orange or pink flowers. Rough brown bark. Large gumnuts are a distinctive feature.

Species: **Eucalyptus cladocalyx**
Common Name: Sugar Gum
Mature Height: 25-30m
Origin: Western Australia

Tall eucalypt with a very open habit at maturity. Pale blotchy gum bark and dark green quite glossy foliage.

Species: **Eucalyptus todtiana**
Common Name: Blackbutt
Mature Height: 10-15m
Origin: Western Australia

Small tree with drooping open canopy and dull green foliage. Flowers are white and appear in late summer. Bark is ashy grey, rough and fibrous. Indigenous to coastal sandplains of the Perth area.

Species: **Ficus rubiginosa**
Common Name: Port Jackson Fig
Mature Height: 25-30m
Origin: Western Australia

Majestic large, wide-spreading evergreen tree with large dark glossy oval leaves, felted rusty red beneath, in a very dense canopy. Produces masses of small yellow figs in autumn.

Species: **Melaleuca quinquenervia**
Common Name: Broad Leaved Paperbark
Mature Height: 15-20m
Origin: Australia

Medium upright broadly columnar paperbark tree with quite coarse foliage and abundant pendulous cream flower spikes during summer. Distinctive and attractive form.

Species: **Erythrina indica**
Common name: Coral Tree
Mature Height: 8-10m
Origin: India to western China

Large spreading late deciduous tree with bright green deltoid leaves and extremely striking clusters of large bright red pea flowers against the bare branches in winter

Species: **Eucalyptus erythrocorys**
Common name: Illyarrie
Mature Height: 5-10m
Origin: Western Australia

A mallee type eucalyptus. A spreading shrub or small tree with thin stems rising from a swollen woody base below ground level. The name erythrocorys refers to the red flower cap, which provides an interesting contrast to the yellow flowers in early summer.

Species: **Eucalyptus utilis**
Common name: Coastal Moort
Mature Height: 5-10m
Origin: Western Australia

Small tree (mallet or mallee) with dense, glossy olive green foliage, pale brown/grey smooth bark decorticating to bronze, pinkish-grey or green. Branchlets orange-red, somewhat drooping.

Species: **Jacaranda mimosifolia**
Common name: Jacaranda
Mature Height: 10-15m
Origin: South America

Small to medium late-deciduous tree with fine fern-like foliage and masses of blue tecomma-shaped flowers in early summer. Papery brown circular flattened pods.

Species: **Melaleuca viminalis**
Common Name: Weeping Bottlebrush
Mature Height: 6-10m
Origin: Australia

One of the most widely cultivated bottlebrushes, typically features a weeping habit with pendulous foliage. Large bright red flowers are seen in spring and autumn.

Species: **Platanus x acerifolia**
Common name: London Plane Tree
Mature Height: 20-30m
Origin: South America

The London Plane is thought to be a hybrid of *P. orientalis* and *P. occidentalis*. Best known for its longevity and spreading crown, the tree is capable of being grown in most temperate latitudes, though it benefits greatly from warm summers.
