

CONDITIONS FOR PLANTING OF COUNCIL VERGE

- Provision to Council of a diagrammatic to scale sketch or plan indicating proposed location of plants and proposed plant species. Any proposed irrigation also to be shown (see separate conditions regarding irrigation).
- The plants are preferably to be natives appropriate to the East Fremantle area.
- Spikey plants are not permitted.
- A woodchip bund is to be provided around the plants to clearly define the location of the plant and to allow for proper watering
- All excess soils and litter resulting from the plantings is to be removed at the applicant's cost
- Growth of the plants is to be maintained within the confines of the verge area and not be allowed to spill into the footpath or road areas, and not allowed to exceed a height of 600mm
- Plants are to be maintained in a weed free state at all times and are to be watered to establish and maintain them.
- Council accepts no responsibility for the plants' health and well being.
- Should it be deemed necessary for any reason, Council reserves the right to carry out any necessary works on the verge or authorise others to do so, whether this necessitates removal of any plantings or not, at no cost to Council or other authorised party.
