

## East Fremantle Oval Precinct

The development of the new vision for this area is gaining momentum! The Town is excited to be undertaking the development of a masterplan and business case for the revitalisation of the East Fremantle Oval Precinct.

With support from an appointed consultant, the Town is investigating how to upgrade site facilities for the Oval's key users as well as inclusion of other recreational and community amenities for public use.

The work builds upon previous consultation with the community to deliver a preferred masterplan. Note: all input and comments received previously will be taken into account

## Next Steps...

Over the next few weeks, Town staff and elected officials will work closely with the appointed consultant to deliver a masterplan and business case for the proposed development based on all consultation and investigation undertaken to date.

Once the masterplan and business plan have been developed (in partnership with the community), then:

- The Town will begin the funding procurement process for the project with both private and public sector partners.
- Once funding is acquired, the detailed design development process will commence, further shaping how the Precinct will look and operate.
- A development approval submission will be delivered to Council.

It is expected the masterplan and business plan stage of the process will be concluded by the end of the current financial year at the end of June 2020, but if extensions are needed, our community will be advised

## Project Status

Work completed to date includes:

- Consultation with each of the Oval Precinct's key users, including current tenants.
- Consultation with nearby residents, and other community and sporting groups to find out who could potentially be included in the future plan for the site.
- Consultation with Council and community members of all ages and interests to identify what they would like and not like to see included in the development. The results of that most recent survey are available [here](#).
